### **Donald A. Haas, RLA, Branch Manager**

[Donald@bogiaeng.com](mailto:Donald@bogiaeng.com)

---

Donald A. Haas has been employed at BEI since 2006 starting as CADD manager and now the Exton Branch Manager, his responsibilities include managing the Exton office location for BEI and coordinating between the different offices. He is responsible for running all aspects of projects from conception through completion. He cultivates working relationships with reviewing agencies to ease project completion. Donald is a registered Landscape Architect in Pennsylvania and Maryland and also has acquired a Chesapeake Bay Landscape Professional certification.

**Education:** Drexel University, BS in Digital Media, 2003, Architecture Minor  
University of California, Irvine, Project Management Certification  
Investigative Engineers Association, Investigative Engineering Certificate  
Peter Dallas Associates Inc., Fire Investigation Certificate  
Chesapeake Bay Landscape Professional Certificate

### **Professional Experience:**

#### **Union Township – Berks County, Pennsylvania**

Performed review of the Highway Occupancy Permit (HOP) for the Township regarding traffic improvements along Route 724 for the Motorsports Park Complex.

#### **Harrisburg, Pennsylvania – Dauphin County**

Provided parking lot design for the United States Postal Service including a loading dock, truck-turns, and vehicle movement in order improve the over traffic flow of the lot; Implemented stormwater routing for the United States Postal Service site.

#### **East Bradford Township – Chester County, Pennsylvania**

Acted on behalf of the Township Engineer to perform full Land Development engineering design services for a proposed new building, stormwater facilities, and parking lot for a site within the Township boundaries.

#### **Spring Township – Berks County, Pennsylvania**

Performed traffic counts and analysis for coordination of a 100-acre development project and a Point of Access Study for Route 222 connection. Designed and assisted in modeling traffic simulations for a Diverging Diamond Interchange to correct existing traffic congestion problems.
